

Easy Access to the Most Comprehensive House Price Trend Information in Canada

The RPS House Price Index empowers financial institutions to make enhanced analyses, risk management decisions and portfolio valuation with comprehensive data.

The most common uses of the RPS House Price Index include:

1. Mark-to-market portfolio analysis
2. Calculate capital allocations
3. Determine risk and underwriting policies
4. Provide reporting to executives, regulators and policy makers
5. Identify growth opportunities and manage customer retention

The Most Comprehensive House Price Trend Information in Canada

RPS House Price Index is recognized as the single most comprehensive source for house price data with index values, median house price dollar values and additional data from a national to a local level.

BROAD

House price trends are provided broadly across the country, delivering the most robust national view of Canadian house price trends.

DEEP

House price trends are provided at 6 geographical levels, including 2,500 local markets and further categorized by 6 key property styles.

DETAILED

Detailed supplemental information is provided, like neighbourhood homogeneity, rural/urban indicators and upper/lower price band data.
